

Dear Parents,

The Baldwin County Board of Education, in cooperation with HNH Immunizations Inc., will once again offer the influenza (FLU) vaccines in schools. The vaccination will be made available to all students, except for students who are dependents of parents insured by the Public Education Employee Health Insurance Program (PEEHIP). Employee's children are given the opportunity to participate in the Alabama Department of Public Health Wellness school clinics and are **not eligible** for this program.

The live attenuated influenza vaccine (LAIV), also known as the nasal spray, is not available. We will only offer the injectable vaccine. The clinic will be held on October 5-7, 2020. Consent forms will be sent to all parents directly from the school. The consent form must be completed and signed by the parents.

Please return the form to your child's school nurse. Students will not receive the vaccine without a properly signed consent form.

Sincerely,

*Linda W. Jones*
