The Baldwin County Public School System continues to monitor updates on COVID-19 based upon current guidance from the Center for Disease Control and remains in contact with Alabama Public Health Department officials.

Based on the CDC website under “travel guidelines”, presently there are no travel restrictions for locations within the United States. BCPSS will continue to monitor student field trips and make decisions on a case-by-case basis based on current information available.

BCPSS understands some parents or guardians may have concerns regarding their child’s participation in field trips. Student participation in instructional or student activity field trips is always optional at the discretion of the parent or guardian.

If a student does not participate in an instructional program field trip during the school day, the school will provide an appropriate educational alternative.
