

Career Preparedness A

Mrs. Sessions

Syllabus

What is Career Preparedness?

The Career Preparedness course focuses on three integrated areas of instruction—academic planning, financial literacy, and technology. Career Prep A focuses only on the first and third areas. Course content ranges from college and career preparation to computer literacy skills to ways to manage personal finances and reduce personal risk. The area of technology is embedded into the course instruction. Mastery of the content standards provides a strong foundation for student acquisition of the skills, attitudes, and knowledge that enables them to achieve success in school, at work and across the span of life.

What will we learn?

As part of preparing students to be college and career ready, this course also equips them with the skills needed for business and industry, continuing education, and lifelong learning.
