Dear local business owner,

Gulf Shores Middle School is starting our first ever all electric racing team in collaboration with Greenpower USA. This race car is designed, constructed, raced, and modified in pit row during competitions by our middle school students through our new engineering class entitled “Makerspace”.

The specific goal and purpose of this fundraiser is to acquire construction materials, tools, race equipment, and additional financial assistance to help support our race team with the fabrication process, race fees, and travel expenses.

You can help our race team reach the winners’ circle by one of two ways. Option one is through financial sponsorship/donations, and places your company logo decal directly on our race car! Option two is a materials or tools donation. Option two donations will be used to construct our second race car as well as the tools/materials needed to finish the build. This second option places your company logo directly on the race car as well. Both sponsorship option details are attached.

Checks can be made out to *Gulf Shores Middle School*. If you are choosing to donate materials through option two, please use the contact information below at your nearest convenience to schedule a time for me to pick up the materials from your business. I will supply a charitable donation letter for tax purposes. (County policy does not allow this letter to include the dollar value of the materials, however.)

Gulf Shores Middle School truly appreciates your company’s role in our goal of continuing our first ever race team. Go Dolphins!

Thank you for your time and consideration,

A. Scott Prince
