

**Building Excellence
Health Services**

September 15, 2023

Dear Parent or Guardian,

Baldwin County Public Schools, in collaboration with HNN Immunization Inc., will once again offer the influenza (FLU) vaccine in schools **October 18-20, 2023**. The vaccination will be made available to all students except for students who are dependents of parents medically insured by the Public Education Employee Health Insurance Program (PEEHIP). Employees' children are given the opportunity to participate in Alabama Department of Public Health (ADPH) clinics and are not eligible for this program.

The live attenuated influenza vaccine (LAIV), also known as the nasal spray flu vaccine, is **not** available this year. We will only offer the injectable vaccine.

Consent forms were sent to all parents directly from the schools. The consent form must be completed and signed by the parent or guardian. Incomplete forms will not be accepted. Students will not receive the vaccine without a completed, signed consent form. Please return the completed form to your child's school nurse as soon as possible.

Sincerely,

Alison Rudd, EdD, RN, CRNP
Health Services Coordinator
